Seasonal Task Prompts

Questions to ask yourself each season, then write your own answers in the margins

These prompts are planning questions, not professional advice. Confirm animal care and food-safety details with your local extension office or veterinarian.

Spring

Do you know your last frost date?
Are seed-starting supplies, soil, and trays ready?
Have fences, coops, and hutches been checked for winter damage?
Are garden tools cleaned and sharpened?

Summer

Is every animal's shade and water plan solid for hot days?
Is watering and mulching on a schedule?
Are you harvesting often enough to keep plants producing?
Do you have jars, lids, and freezer space ready for preserving?

Fall

Are crops harvested, cured, and stored the right way?
Are coops, barns, and shelters ready for colder weather?
Is firewood, feed, and hay stocked up?
Have you noted what worked and what didn't this year?

Winter

Is there a plan for frozen water for every animal?
Do you have a power outage plan for heat, light, and food?
Are seed orders and next year's garden plan underway?
Is your emergency kit stocked and easy to reach?
